SUMMARY

Software Testing Intern with 6 months of hands-on experience @ LeadSquared across manual, UI and API automation testing. Built and scaled a Playwright + TypeScript UI automation framework covering 1,000+ test cases, and 600+ API tests using Java and REST Assured. Strong full-stack foundation in React, Next.js and PostgreSQL, passionate about building reliable, scalable software through AI-assisted engineering workflows.

EXPERIENCE

Software Testing Intern — LeadSquared

6 Months

UI Test Automation Framework

- Performed both manual and automation testing (UI and API) across product modules, strengthening release quality and regression coverage.
- Built and scaled an end-to-end UI automation framework, automating **1,000+ test cases** across multiple product modules using **TypeScript** and **Playwright MCP**, with **Jenkins**-based CI execution and reporting.
- Executed manual testing across multiple product features and resolved defect tickets end-to-end, ensuring functional quality throughout the release cycle.
- Designed and implemented **600+ automated test cases** across **40+ WCF API endpoints** using **Java** and **REST Assured**, ensuring comprehensive API validation and reliability.
- **AI-Assisted Engineering:** Leveraged enterprise access to Anthropic's Claude to accelerate project development, delivering high-quality work faster through efficient AI-assisted workflows.

EDUCATION

B.E. Computer Science and Engineering — B.M.S College of Engineering, Bengaluru

2022 – 2026

CGPA:7.46/10.0 · Pre-University(XII):96.5% · SSLC(X):94.4%

SKILLS

Languages	Java, TypeScript, Python
Frontend	React.js, Next.js
Backend	Express.js
Databases	MySQL, PostgreSQL
Testing	Manual Testing, UI Automation (Playwright), API Automation (Java + REST Assured)

PROJECTS

StockPilot — Inventory Management System

- Developed a full-stack inventory platform modeling stock as an append-only movement ledger.
- Built with Next.js, TypeScript, Prisma and PostgreSQL, with RBAC, audit trails and lot tracking.
- Integrated a Claude-powered AI reorder advisor; deployed on Vercel with Neon PostgreSQL.

ChurnGuard — AI Churn-Risk Dashboard

- Developed an AI dashboard that scores SaaS accounts 0–100 for churn risk with save actions.
- Built with Next.js, TypeScript and Prisma, using Claude tool-use for structured scoring.
- Tracked score history to power risk trends and revenue-at-risk KPIs; deployed on Vercel.

BookIt — Appointment Booking System

- Developed a multi-vertical booking platform (clinics, salons, turfs) with live slot availability.
- Built with React, TypeScript, Express and PostgreSQL, secured by JWT auth and Zod validation.
- Eliminated double-bookings using advisory locks and PostgreSQL GiST exclusion constraints.

Additional Work: Built and deployed an AI Finance Dashboard on AWS (Lambda, DynamoDB, S3), AskMyDocs — a RAG-based document Q&A app, an Event Ticketing Platform and a Netflix clone end-to-end.
